mg12

100% made in Italy

il carattere innovativo si afferma quando un prodotto non è capito al primo colpo non è riconoscibile

immediatamente perché è una proposta nuova, ancora estranea alle usanze

mg12 è un'azienda che crea prodotti di design made in Italy e eco-friendly, senza vincoli di materiali o settore, per architetti e amanti del design. I prodotti mg12 hanno un forte valore aggiunto, dal design molto curato e innovativo, utilizzano diversi materiali naturali e non inquinanti. si avvale di maestranze italiane provenienti da vari ambiti, quali l'artigianato e l'industria, per la produzione dei suoi prodotti. L'azienda vuole affrontare il mercato e proporsi di lavorare direttamente con gli architetti in grado, forse prima e meglio di altri, di individuare le necessità e i prodotti innovativi. Molti prodotti sono personalizzabili per andare incontro alle esigenze di progetti quali alberghi, SPA e complessi residenziali.

mg12 is a new design brand made in Italy and eco-friendly, without materials or sector constraints, for architects and design lovers. The products of mg12 have considerable surplus value in terms of meticulous innovative design, they use various natural and not poluttant materials. Italian workers, from various areas such as crafts and industry, are involved in the manufacture of its products. The company intends to respond to the market without so many intermediate steps, offering to work directly with architects. they can recognise needs and innovative products perhaps before and better than others. Many mg12 products can be customized to meet the needs of projects such as hotels, spa centers and residential complexes.

mg12 es una nueva marca de diseño cuyos productos están enteramente fabricados en Italia y son eco-friendly, sin ningún tipo de limitaciones de materiales o del sector, para amantes del diseño. Los productos de mg12 tienen un considerable valor añadido debido a su meticuloso e innovador diseño y por el uso de materiales variados y no contaminantes. mano de obra italiana altamente cualificada tanto en artesanía como en industria es empleada en la producción de sus productos. La compañía intenta dar una respuesta a la demanda del mercado y, intentando evitar intermediarios, trata de trabajar directamente con arquitectos capacitados para reconocer necesidades y productos innovadores antes y mejor que otros. Los productos de mg12 pueden ser personalizados para dar cobertura a las necesidades de determinados proyectos tales como hoteles, spas y complejos residenciales.

mg12 é uma empresa que cria produtos de design made in Italy ed eco-freindly, sem vínculo de material ou setor, para arquitetos e amantes de design. Os produtos da mg12 têm um forte conteùdo de projeto, muito elaborado e inovativo. Utilizam diversos materiais naturais e não poluentes. Desfruta da maestria de artesãos de vários setores e da reconhecida industria italiana para a execução de seus produtos. A empresa quer enfrentar o mercado divulgando as suas criações principalmente aos arquitetos e designers que, certamente, são aqueles que reconhecem primeiramente novas tendências e que anticipam estilos de vida. Os produtos da mg12 podem ser inteiramente personalizados para atenderem as exigências de projetos como hotéis, spa e complexos residenciais.

mg12 ist eine neue Designmarke "made in Italy", grenzenlos in Bezug auf Materialien und Anwendung, konzipiert für Architekten und Design-Liebhaber und wird ausschließlich umweltfreundlich gefertigt. Die Produkte von mg12 schaffen Wert durch ihr detailliertes und innovatives Design, sowie durch den Einsatz vielseitiger und naturfreundlicher Materialien. Die Fertigung der Produkte erfolgt durch hochqualifizierte Handwerker und Industrieexperten in Italien.Das Unternehmen ist bemüht Antworten auf den Bedarf des Marktes zu geben und versucht, ohne Zwischenhändler direkt mit selektionierten Architekten zusammenzuarbeiten, welche fähig sind Bedürfnisse und innovative Produkte zuerst und besser erkennen zu können. Viele der Produkte von mg12 können speziell auf die Bedürfnisse der Kunden angepasst werden, um so z.B. den besonderen Anforderungen von Hotels, Spa's und Wohnre-sidenz-Projekten gerecht zu werden.

mg12 est une nouvelle marque de design, sans aucune limitation de matériaux ou du secteur, pour les amateurs du design, dont les produits sont entièrement fabriqués en Italie et sont respectueux de l'environnement. Les produits mg12 ont une forte valeur ajoutée, avec un design soigné et innovant, utilisant divers matériaux naturels, respectueux de l'environnement. la production bénéficie d'une main d'œuvre italienne provenant aussi bien de l'artisanat italien que sur l'industrie de proximité. Pour progresser sur son marché, mg12 souhaite entrer directement en contact avec les architectes qui sont à même d'anticiper les tendances et sélectionner les produits innovants.
une partie de la production peut être personnalisée pour s'adapter aux exigences de projets tels que les hôtels, les SPA et les résidences immobilières.

round

watt 90
110/220V

round è sconcertante per semplicità e bellezza, perfetto ed entusiasmante come una luna piena. è realizzato in alluminio verniciato a polvere con pittura epossidica ad alta resistenza. Round appartiene alla collezione 'geometrici'.

round is elegant due to its simplicity, perfect and exciting as a full moon. it is made of powder-coated aluminium with high resistance epoxy paint. round belongs to 'geometrici' collection.

square

watt 90
110/220v

elegante, fluido, porta all'ambiente l'equilibrio delle forme classiche;
realizzato in alluminio verniciato a polvere con pittura epossidica ad alta resistenza. square appartiene alla collezione 'geometrici'.

elegant and smooth, it brings the balance of classical forms to its surroundings. it is made of powder-coated aluminium with high resistance epoxy paint. square belongs to 'geometrici' collection.

rectangle

watt 90
110/220v

utile, regolare, austero, e personalizzabile, offre un duplice utilizzo dello spazio. è' realizzato in alluminio verniciato a polvere con pittura epossidica ad alta resistenza. rectangle appartiene alla collezione 'geometrici'.

useful, regular and severe, rectangle offers a dual use of space and it allows customization, it is made of powder-coated aluminium with high resistance epoxy paint. rectangle belongs to 'geometrici' collection.

slim

watt 90
110/220v

adatto ovunque, è realizzato in alluminio verniciato a polvere con pittura epossidica ad alta resistenza. Slim appartiene alla collezione 'geometrici'.

it fits everywhere and it is made of powder-coated aluminium with high resistance epoxy paint. Slim belongs to 'geometrici' collection.

rectangle & shelves

watt 90
110/220v

pratico e versatile, ideale per piccoli spazi, è realizzato in alluminio verniciato a polvere con pittura epossidica ad alta resistenza. Rectangle & shelves appartiene alla collezione 'geometrici'.

practical and versatile, ideal for small spaces, it is made of powder-coated aluminium with high resistance epoxy paint. Rectangle belongs to 'geometrici' collection.

slim & shelves

watt 90
110/220v

i modelli della collezione 'geometrici' possono essere personalizzati in base alle richieste: sulla superficie frontale può essere applicato uno specchio, o in alternativa è possiile verniciarlo per mimetizzarsi o risaltare nell'ambiente.

'geometrici' products can be customized according to the customer's request: the frontal surface could be customized with a mirror, or painted in any color in order to be draw attention to itself or mimic the surroundings.

il radiatore entra nell'ambiente domestico in modo nuovo e con forme innovative, espressione della ricerca, del progetto, del design e del gusto. Prodotto modulare e scalabile, si adatta alle singole esigenze; la possibilità dell'utilizzo con i modelli scaldasalviette ne accresce la flessibilità.

mg12, azienda specializzata nella produzione di elementi radianti e scaldasalviette elettrici , è una realtà d'avanguardia che utilizza le più avanzate tecnologie di produzione e gestione dei processi produttivi, sorpassando la produzione seriale di oggetti per la proposta di soluzioni tailor made.

la nuova generazione di radiatori è nata pensando all'ambiente e la loro vocazione ecologica si integra perfettamente con sistemi di generazione di calore a basse temperature come caldaie a condensazione, pompe di calore e pannelli solari. La sostenibilità ambientale è garantita attraverso un sistema teso a massimizzarne la resa e ridurre il più possibile il contenuto d'acqua.

la verniciatura avviene mediante un processo di polimerizzazione che consiste nell'applicazione di polveri termoindurenti in resine poliesteri, dallo spessore variabile dai 90 ai 130 micron e successivamente cotte in forno ad una temperatura controllata di 200 °C per aumentare la protezione alla corrosione e migliorarne la qualità, la resistenza e la durevolezza.

the radiator element fits the domestic space in a new brand look. It is an expression of the research, project, design and taste.
it's a modular and scalable product adaptable for every need; the radiator becomes much more versatile when combined with our towel warmers.

mg12, company specialized in radiant elements and towel warmers production, is an avantgarde reality that use the most sophisticated productive technologies and innovative production processes management, surpassing the serial production and proposing tailor made solutions.

the new radiators generation is born thinking about the environment and the nature. their ecological feature is perfectly integrated with low temperature systems such as condensing boilers, heat pumps and solar panels.
the environment sustenibility is guaranteed thanks to a system that gives the maximum performance and reduces the water content.

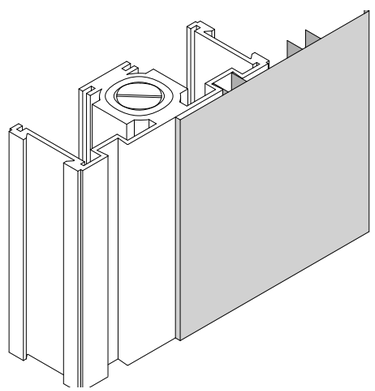

the painting is made through a polymerization process: applying thermoset powder in polyester resins, variable thickness from 90 to 130 micron, then backed in a hoven at 200° to increase corrosion protection and improving the quality, the resistence and durability.
